

## Answer Key

### B.C. beetle infestation rages out of control

Broadcast Date: Nov. 13, 2000

1. An entomologist is a scientist that studies insects.
2. Extremely cold.
3. The worst in history.
4. Millions of trees and billions in dollars.
5. No. they kill the larval beetles.
6. 1985 – 1986
7. 800,000 hectares.
8. No, it cannot. It can only be harvested or the beetles can die - the beetle populations are too high to allow for the trees to resist them.
9. A forest fire.
10. 4 times – quadruple.
11. Better forest management of infected areas = more tree cutting.
12. The Japanese market is closed because the Japanese will not buy stained lumber.
