

Jane Chen

A warm embrace that saves lives (5:00)

Digital Archive

Note-taking activity

Vocabulary:

- hypothermia: abnormally low body temperature.
- counterintuitive: contrary to what common-sense would indicate.

Directions: Listen and take notes. Using your notes answer the following questions.

True or False

- \_\_\_\_\_ 1. A premature baby is able to regulate his/her body using fat reserves.
- \_\_\_\_\_ 2. Worldwide more than 2 million premature babies are born each month.
- \_\_\_\_\_ 3. 4 million premature babies die each year.
- \_\_\_\_\_ 4. The majority of premature babies that survive will grow up to be healthy.
- \_\_\_\_\_ 5. The first month of a baby's life is about growth.
- \_\_\_\_\_ 6. Incubators are a solution to the hypothermia problem but are expensive.
- \_\_\_\_\_ 7. Jane Chen's solution to the problem is a radical change from the  
traditional incubator.
- \_\_\_\_\_ 8. Chen's non-traditional incubator will still be expensive.
- \_\_\_\_\_ 9. Her goal is to save babies and lower population growth at the same time.
