

Answer Key
The True Cost of Oil
Garth Lenz

TED Lectures
Note-taking Activity

1. The Boreal Forest.
2. They clean the air and the water. They trap greenhouse gases, and they are important breeding grounds for birds.
3. Over 10,000 years.
4. The second largest reserves in the world.
5. The giant scale and size of the tar-sands mines.
6. 40 – 50.
7. Because it produces the most greenhouse emissions in processing.
8. 9,000 acres.
9. The first nations people who live near them.
10. Because he feels terrible that the first nations family must eat the fish from the polluted river.
11. Not at all. Canada is now one of the worst offenders and often places obstacles in the way of countries that want to improve the climate.
12. According to the speaker things are going to get much worse.
13. Production will increase by 4 times by 2030.
14. Say not to the projects and yes to a cleaner future.
